

*If you are tossing up between builders then let me help you decide: Go with Preston Construction Group! I could fill up an entire page with the things these guys did for me throughout my renovation/extension project that were above and beyond my expectations but I will let you discover for yourself just how accommodating they are when you make the choice to build with this outstanding company.*

*My family circumstances changed part way through the build but Mike, John and Cameron took it all in their stride. They stepped up and helped me understand all the technical bits that really made no sense to me and did so in a manner that I never felt embarrassed when asking them to explain something to me (no matter how many times I asked the same question).*

*Timelines were met, plans were followed, quality was incredibly high but one thing that really stood out to me was how clean they all were. There was never any mess left at the end of the day! They also made sure that they minimised any disruptions to my family and always keep me in the loop.*

*I often sit in my new lounge room in awe of the space around me. Everything is just perfect. Mike went over the plan with me continuously in the initial stages ensuring that absolutely everything was just right. The entire process, from quote to completion, was made so easy by Mike and his boys. Whenever I hear anyone mention renovating or building I always drop Preston Construction Group into the conversation and proudly share my experience. I would (and do) recommend this company to anyone looking at building, extending or renovating their dream home.*
