

In 2016 we decided to build on our property at Dululu, this was to be our 'forever home'. So it was essential we got it right. Thankfully we came across Preston Construction and in conversations with others, Mike and his team came highly recommended.

From the very first meeting though to the completion of our home we found Mike easy to communicate with and he gave us confidence in his workmanship and input towards our plans and ideas along the way. He was flexible with any changes throughout the project and we never felt like anything was an issue.

Mike was always accommodating to us dropping in to check on the progress and always made time to keep us informed of what stage everything was at. Being that Mike is a small business owner rather than a franchise it made it so much easier to source any special features etc we wanted to add as we were not locked into a 'kit' style design.

The building site was always kept clean and tidy, inside and out. You can tell that Mike and his team take pride in their work and strive to keep the client happy.

We are incredibly happy with our new home and can honestly say the building process was a simple and hassle free one. We would recommend anyone looking to build a quality home to go with Preston Construction.
